Welcome to Flying S Herefords!

We would like to invite you to join us for our Third Annual Production Sale here at the ranch. Flying S Herefords Ranch is located in Paluxy, Texas, southwest of Fort Worth.

Our mission at Flying S Herefords is to produce elite Line One Horned Herefords. Over the past years, we have invested in the top bloodlines of the finest Line One Herefords in America from Holden Herefords and Cooper Herefords. Our focus is on every aspect of the Hereford breed. We believe in a long-lasting performance Line One breeding program to increase the predictability of our cattle for our customers. In order to succeed in Line One breeding, one must continue to introduce cattle with superior genetics. Flying S Herefords focuses heavily on the maternal abilities in our breeding program. We have a strict culling program that enables us to produce and retain only the genetically superior animals. Cows are culled based on fertility, performance, soundness, disposition and udder quality. We are active members in the Texas Hereford Association along with the American Hereford Association; we are involved with the TPR program of the American Hereford Association and are active members in the Whole Herd Reporting Program.

It is a great pleasure to be able to offer such an outstanding set of bulls and females. This group of bulls represents the best of our fall 2015 and spring 2016 calf crops. They are all sired by top trait leading, high quality Line One bulls. They are a balanced trait set of bulls that combine uniformity, pigment, maternal strength, thickness, performance, fleshing ability and carcass with eye appeal. All bulls and heifers sell with performance and ultrasound data and have been DNA parentage verified as well as have been tested IE Free, HY Free and Dilutor Free. **All bulls have been trich and semen tested.**

As in our past two sales, we will offer some special female lots. We are offering a Buyer's Choice lot out of our top genetics—these are two fall bred heifers sired by HH Advance 1069Y and out of HH Miss Advance 7003T and HH Miss Advance 8064U. Another "special feature" lot we added this year is an IVF flush on choice of four of our most elite, proven donors. Then, we are offering a Choice Flush between three of our young and upcoming donors. We are also selling embryo packages from some of our best genetics. In addition, we are selling fall bred top notch heifers, an outstanding set of open yearling heifers, fall bred cows with heifer calves at side, and a set of fall bred top quality cows.

All sale cattle and the cow herd will be on display March 20th and 21st up to sale time. On Monday, the 20th, we will have drinks and snacks available along with cow herd tours in the afternoon. On sale day, snacks and lunch will be provided, catered by Hard Eight BBQ. Lunch will be served at 11:00 a.m., and the sale starts promptly at 12:00 noon.

Thank you for taking the time and having an interest in our program—we look forward to seeing y'all. If you have any questions or if we can be of any help, please feel free to call us anytime.

1098Y was the high selling bull in Holden's 2012 sale at \$102,000 for 3/4 interest and 1/2 possession. He is a curve bender deluxe, with outstanding calving ease combined with exceptional growth and maternal strength. He is a long bodied, smooth made bull with loads of pigment. He is backed by one of Holden's strongest cow families, and his dam is one of their very best young donors. She is a super functional cow with a perfect udder and loads of milk. Maternal granddam is the great 1028L donor cow that is one of the top cows they have ever produced. 1098Y is a Trait Leader for Calving Ease, Milk, M&G and REA EPDs.

2125Z is an outstanding bull that really brings it all together. He is goggle eyed and heavily pigmented, long bodied and deep sided and has great muscle expression. He is very sound made and has lots of eye appeal. He has a great set of EPDs and had an 80 lb. actual BW. His dam is a perfect uddered young cow with goggle eyes, and his granddam is the 4016P cow that sold for \$37,500 in Holden's 2010 Cow Sale. His great granddam is the great 0023K cow that was a superior donor for Holden.

Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 15 traits and calculates four profit (\$) indexes.

The eight EPDs and the \$Index included in our 2017 sale catalog are:

Calving Ease Direct (CED)

CED EPD is based on calving ease scores and birth weights and is measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of +3.6 and sire B has a BW EPD of +0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lbs. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of +60 and sire B has a WW EPD of +40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lbs. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of +100 and sire B has a YW EPD of +70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lbs. heavier at a year of age when compared to sire B's calves.

Maternal Milk (Milk)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 Milk EPD should produce progeny with 205-day weights averaging 24 lbs. more (as a result of greater milk production) than daughters of a bull with a Milk EPD of -10 lbs. (14 minus -10.0 = 24 lbs.). This difference in weaning weight is due to total milk production during the entire lactation.

Read more online at: <http://hereford.org/static/files/HerefordEPDs.pdf>

Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a +29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lbs. heavier than progeny of a bull's daughters with a M&G EPD of 10 lbs. (29 minus 10 = 19 lbs.). It is equal to one-half the sire's weaning weight EPD plus all of his Milk EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, or IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Certified Hereford Beef Index (CHBS)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CED and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF, with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest, where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to back-grounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

TOP HEIFER BULL PROSPECT

Calving ease bull deluxe! 609D is a sure shot heifer bull prospect with +4.3 Calving Ease and +1.2 BW EPDs. His actual BW was only 69 pounds. He is moderate framed, deep ribbed and thick topped complemented with lots of eye appeal. 609D is a full brother to lots 6002D and 6003D and a maternal brother to lots 6004D and 6005D. His dam is a young and upcoming donor for us that is super uddered and phenotypically correct.

- Top 3% of breed on WW, Milk and Scrotal EPDs and \$CHB
- Top 10% on CED EPD
- 113 NR and 105 YR
- Dam sells as a "Pick of the Donor IVF Flush"

FS Advance 610D

Note:

All bulls ranking in the top 20% or higher for \$CHB qualify for the American Hereford Association's Hereford Advantage Program. For details, see the ad on the inside back cover of this catalog.

+2.5	+2.4	+44	+67	+38	+60	-.49	+.39	+19	

Outstanding donor cow with tons of power and volume and a great udder combined with a powerful EPD profile and a great phenotype. 7142T is the dam of the HH Advance 9144W bull that topped Holden's 2010 sale and also the dam of Holden's HH Advance 1069Y ET herd sire. She has several outstanding daughters in our herd along with Holden's herd that are incredible producers. She got banged up on the truck down from Montana a few years ago, and it is now starting to take a toll on her. I thought last year would be the last time to sell a flush out of her, but since I don't know how much longer we will have her, we are including her one more time. Four sons sold for an average of \$13,125 in last year's sale, with the top bull selling for \$20,000 to Ryan Bullinger. Other sons sold to Star Valley Ranch, JNJ Ranch and Matt Braun. She was picked for the "Choice Flush" last year that sold to Holden Herefords for \$15,000, and her bred heifer was also purchased by Holden Herefords for \$12,000. 7142 has produced 30 to 50 oocytes in the last four IVF collections and freezing 10 to 24 No. 1 embryos.

9028W is heavily pigmented and has a perfect udder, lots of milk and tons of fleshing ability. She is a direct daughter of the great Holden HH Miss Advance 1028L donor and is further proof of what a strong female line this is.

9028W is one of four full sisters to Holden's 9075W herd sire. Her full sister produced the HH Advance 1098Y herd sire that was the high selling bull at Holden's 2012 Production Sale for \$102,000. Two sons sold in our 2015 sale and averaged \$10,250. We also sold a flush last year to Star Valley Ranch for \$10,000. Her daughters in production have amazing udders and are raising some incredible bulls and heifers.

BUYER'S CHOICE DONOR FLUSH

HH Miss Advance 0232X

TERMS OF DONOR FLUSH NO. 1:

- Selling the right to flush the buyer's choice of 7142T, 9028W, 0232X or 2171Z with a guarantee of six (6) transferable embryos and one pregnancy if put in by a certified embryologist.
- In the case that more than six embryos are produced, the buyer will receive all the embryos.
- In the case that less than six transferable embryos are produced, the price will be prorated per embryo and that portion refunded back to the buyer.
- The flush will be IVF and performed by Hoofstock Genetics, LLC.
- All costs associated with the flush will be the responsibility of the buyer. These donors are available to flush to the bull of your choice right after the sale once payment is received.

BUYER'S CHOICE DONOR FLUSH

Buyer's
Choice

Donor Flush #2

Here is a rare opportunity we are offering this year. For the first time ever, we are offering a choice flush on three of our youngest and most promising donors. The three we have chosen we believe offer the most exclusive genetics in our herd.

TERMS OF DONOR FLUSH NO. 2:

- Selling the right to flush the buyer's choice of 4189B, 4349B or 5239C with a guarantee of six (6) transferable embryos and one pregnancy if put in by a certified embryologist.
- In the case that more than six embryos are produced, the buyer will receive all the embryos.
- In the case that less than six transferable embryos are produced, the price will be prorated per embryo and that portion refunded back to the buyer.
- The flush will be IVF and performed by Hoofstock Genetics, LLC.
- All costs associated with the flush will be the responsibility of the buyer. These donors are available to flush to the bull of your choice right after the sale once payment is received.

Our pick in Cooper's 2015 Production Sale for \$30,000. We flushed her after their sale to HH Advance 3006A and HH Advance 4052B. 4189B is a big topped, long bodied, pigmented, high performing 177R daughter. Her pedigree is loaded with some of Cooper's top donors, including her granddam, CL 1 Dominette 440P. On her first natural calf, she posted a 113 NR and 105 YR.

4189B has five top notch herd bull prospects selling—lots 609D, 6002D, 6003D, 6004D and 6005D. You will continue to see more progeny out of her in our herd moving forward.

A phenomenal daughter of the great 5139R donor cow, 4349B just oozes donor cow and has that great front shoulder and classy head and neck set that 5139 always throws. Deep ribbed, thick topped and well marked, she sold for \$31,000 in Holden's 2015 Female Sale. Her full sister is one of Holden's elite donors, and their dam, 5139R, sold for \$175,000 in Hoffman's 2013 sale while a maternal sister by 88X sold for \$180,000. 4349B is one of the best uddered cows on the ranch and has a big, stout HH Advance 1013Y daughter at her side now. She is one of the best 8050U daughters I have seen and will have a huge impact on our herd.

This is a very rare opportunity to inject two of the most elite Line One genetic lines into your herd. The 7142T donor has an outstanding record and is a herd bull and brood cow producing machine. Six offspring in our sale last year alone sold for a total of \$79,500. HH Advance 5107C was the high selling bull in Holden's 2016 sale for \$160,000 and is an elite young herd bull that checks all the boxes. He is a well marked, big topped, square made, sound structured, big ribbed bull with eye appeal to burn. He is phenotypically the best bull we have seen go through a sale ring. His EPD profile combines calving ease with exceptional growth, maternal and carcass strength. Help yourself to a once-in-a-lifetime opportunity.

- Selling two packages of four No. 1 IVF embryos and guaranteeing one pregnancy per package if put in by a certified embryologist.

HH Advance 4052B has outstanding growth, maternal and carcass EPDs. He is a well marked, good pigmented, extra thick 297Z son out of the Holden 9100W donor cow. 4052B is square hipped, big topped and really nice fronted. He is complete in his makeup and has a pedigree loaded with great females. These embryos are going to be rare very soon due to losing him early this year from an injury.

- Selling buyer's choice of 0299X embryos sired by 3006A or 4052B

5107C was the high selling bull in Holden's 2016 sale for \$160,000. He is an elite young herd bull that checks all the boxes. He is a well marked, big topped, square made, sound structured, big ribbed bull with eye appeal to burn. His EPD profile combines calving ease with exceptional growth, maternal and carcass strength.

- The fall bred heifers carry his service

Buyer's Choice Bred Heifers

5011C or 5017C

Here's the chance to pick from two outstanding heifers bred to the \$160,000 HH Advance 5107C herd sire. Both heifers are sired by HH Advance 1069Y, whose daughters are perfect uddered, beautiful fronted and big hipped with loads of maternal strength. Both of these heifers are deep ribbed, long bodied, pigmented and very smooth made.

- Seller reserves the right to one future IVF flush at our expense and the buyer's convenience.

Think **LINE ONE**...Think **FLYING S HEREFORDS!**

STAND OUT WITH PROVEN GENETICS

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 20% for \$CHB.

HOW TO GET STARTED:

Visit HEREFORDFEEDERCATTLE.COM to download the form.

Complete and submit form to American Hereford Association.

Information form with EPD rankings will be returned to the producer.

PERCENTILE	\$CHB
Top Value	50
Top 1%	36
Top 5%	32
Top 10%	30
Top 15%	29
Top 20%	28
Top 25%	27
Top 30%	26

Certified Hereford Beef Index (\$CHB) is a terminal sire index that is built on a production system where Hereford bulls are used on British-cross cows with a focus on gain and end product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a \$CHB value ranking in the top 20%.
