Ranch located southwest of Fort Worth at Paluxy

FlyingSHerefords.com

Welcome to Flying S Herefords!

I hope this finds you and your family well and healthy. 2021 was a crazy year for all of us and a very scary one at best. But looking back on all the hardships, sicknesses, fuel prices, feed prices and fertilizer prices, I learned one thing: "I now love NASCAR, and Brandon Brown is my favorite!" "LET'S GO BRANDON!" FJB

We would like to invite you to join us for our 8th Annual Production Sale at the ranch in Paluxy, Texas, 45 minutes southwest of Fort Worth. Our mission at Flying S Herefords is to produce elite Line One Horned Herefords that will excel in any environment for any type of operation. We have continued to invest in the top bloodlines from Holden Herefords and Cooper Herefords.

Our focus is on every aspect of the Hereford breed. We believe in a long-lasting performance Line One breeding program to increase the predictability of our cattle for our customers, whether commercial or seedstock. In order to succeed in Line One breeding, you must continue to introduce cattle with superior genetics. Flying S Herefords focuses heavily on the maternal abilities in our breeding program. We have a strict culling program that enables us to produce and retain only the genetically superior animals. Cows are culled based on fertility, performance, structure, disposition and udder quality.

We are active members in the Texas Hereford Association along with the American Hereford Association. We are involved with the TPR program of the American Hereford Association and are active members in the Whole Herd Reporting Program.

It is a great pleasure to be able to offer such an exceptional set of bulls and females. This group of bulls represents the best of our fall 2020 and spring 2021 calf crops. They are all sired by top trait leading, high quality Line One bulls. They are a balanced trait set of bulls that combine phenotype, uniformity, pigment, maternal strength, thickness, performance, fleshing ability, carcass and eye appeal. All bulls and heifers sell with performance and ultrasound data and will be DNA parentage verified, GE-EPD tested and tested IE Free, HY Free and Dilutor Free. All bulls have passed a BSE exam and have been Trich tested free.

All sale cattle and our cow herd will be on display March 21st and 22nd up to sale time. On Monday, the 21st, we will have drinks and snacks available along with cow herd tours in the afternoon. On sale day, coffee, snacks and lunch will be provided and will be catered by Hard Eight BBQ. Lunch will be served at 11:00 a.m., and the sale starts promptly at 12:00 noon.

Thank you for taking the time and having an interest in our program. We look forward to seeing y'all sale day. If you have any questions or we can be of any help, please feel free to call us any time.

James, Madison, Stella & Silvie Strode

Announcements made sale day from the auction block will take precedence over statements printed in the sale catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. All persons who attend the sale do so at their own risk. Neither the owners, the management, nor any other person connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

HEREFORD ADVANTAGE

Visit HerefordAdvantage.com to get started today!

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

- **Source & Age verification**
- **Genetic merit**
 - Minimum of 50% Hereford genetics
 - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
 - Bull ownership transferred (all bulls)
- **Vaccination program – two rounds of vaccinations pre-weaning (minimum)**
 - Recommended minimum protocol:

PrimeVAC³⁴
BY MERCK ANIMAL HEALTH

- **BQA certification**

American Hereford Association | (816) 842-3757 | 11500 NW Ambassador Drive, Suite 410, Kansas City, MO 64153 | HerefordAdvantage.com

BENEFITS

- **Genetic improvement tool**
 - **Sire EPD and profit index summary**
- **Added market exposure**
 - **Free listing at HerefordMarketplace.com**
- **Enrollment cost - \$3.00/hd. (verification + eID tag)**

Look for this logo in Hereford bull sale catalogs to identify sires meeting the genetic requirements for the Hereford Advantage program.

KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.

That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.

Hereford.org | 816-842-3757

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes.

The EPDs and \$Indexes included in our 2022 sale catalog are as follows:

Calving Ease Direct (CED)

CED EPD is based on calving ease scores and birth weights and is measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of +3.6 and sire B has a BW EPD of +0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lbs. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of +60 and sire B has a WW EPD of +40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lbs. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of +100 and sire B has a YW EPD of +70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lbs. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (Milk)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 Milk EPD should produce progeny with 205-day weights averaging 24 lbs. more (as a result of greater milk production) than daughters of a bull with a Milk EPD of -10 lbs. (14 minus -10 = 24 lbs.). This difference in weaning weight is due to total milk production during the entire lactation.

Carcass Weight (CW)

CW EPD is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD of 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Breed average EPDs for 2020/2021 born calves:

CED	BW	WW	YW	SC	MILK	CW	REA	MARB	BMI\$	BIIS	CHBS
+2.6	+2.9	+55	+88	+1.0	+26	+68	+40	+0.09	+354	+424	+112

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (Marb)

Marb EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, or IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMI\$)

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep the harvested progeny successful for CHB. *This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.*

Brahman Influence Index (BIIS)

The BIIS is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef® does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. *This index targets producers who use Hereford bulls on Brahman-influenced cows.*

Certified Hereford Beef Index (CHBS)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CED and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF, with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest, where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. *This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.*

For more information, log on to www.hereford.org

BUILT FOR THE SOUTH.

CAPITALIZE ON HYBRID VIGOR WITH HEREFORD.

Hereford heterosis adds longevity, fertility and efficiency to any herd.

At the same time, Hereford leads the way in docility – while increasing profitability by \$51 per cow per year.

The tiger-stripe female: built to survive and thrive.

7193E was the cover bull and leadoff bull in Holden's 2018 sale. He is an exciting son of the \$130,000 5110C Cooper bull. The more you study this bull, the more you will like him. He is soft made, deep flanked, big bellied, extra thick, well marked and very correct in his structure. Three maternal brothers were used in Holden's herd, and a son out of a maternal sister was retained. We think a lot of this cow family and all the functional traits it brings to the table. 7193E also brings in the great 055X cow from Cooper's. He is a front pasture, all around herd sire that is destined to be a breed improver.

7053E is a top-notch HH Advance 5107C son that we retained from our 2019 sale. He is a pigmented, super fronted, easy moving, big bellied herd bull that has explosive muscle expression and natural fleshing ability. To top it off, he is a powerhouse herd bull that is backed by individual performance and EPDs. 7053E has oodles of volume, thickness, a square hip and huge top with maternal, growth, carcass and eye appeal to burn. His dam, HH Miss Advance 7142T, has been a top producing donor and has produced several herd bulls that are working all over the US.

8120F topped Holden's 2019 sale at \$55,000 for 1/2 interest. Look at the bone, substance and overall mass in this fantastic herd sire! 8120F is well marked, big testicled, super correct and out of a great cow. Dam is a top donor with a freckled face and red on her teats. Maternal granddam is a donor for Cooper Herefords and produced the third high selling bull in their 2018 sale. Note the exceptional carcass EPDs and CHB\$ on 8120F. He is a true beef bull that will add value to all segments of the industry!

9076G recorded the highest IMF score at 6.33% that Holdens have had in their 26 years of ultrasound. He is a powerful performance bull with excellent pigment, big testicles and extra length of body, and he is out of a perfect uddered donor cow. He is a grandson of the HH Miss Advance 0121X donor that has produced so many top herd bulls and donor females, and she is the matriarch of one of the top marbling cow lines in the breed. 9076G is a true carcass bull combined with an outstanding phenotype. His first calves on the ground so far are pigmented and stout made.

Important Sale Notes

- ✓ We offer a first breeding season guarantee on all bulls in the sale
- ✓ All bulls have passed a breeding soundness examination and have tested negative for trichomoniasis
- ✓ Free delivery within 500 miles of the ranch is offered on bull purchases of \$10,000 or more. Delivery of any bull will not exceed \$250 per bull. No free delivery on females.

The EPDs printed in the catalog are from the Feb. 21, 2022 American Hereford Association report.

Updated GE-EPDs will be available sale day and online at flyingsherefords.com

The Fall Long Yearling Bulls

This set of fall 2020-born bulls we feel is truly one of the best sets of bulls we have raised to date. As a group, they had an average birth weight of 81 lbs., an average 205-day weight of 730 lbs. and an average 365-day weight of 1331 lbs.

When it comes to carcass, they really scanned great, averaging 12.6 sq. in. for REA and 3.78% for IMF as a group.

How to bid & buy online:

With **SuperiorClickToBid.com**, you can participate in an online auction in just three easy steps:

STEP ONE: BECOME A MEMBER OF THE SITE

Membership is free. All you need to do is click on the "Become a Member" tab, fill in the required info needed and create your own username and password. This will allow you to register for the auctions that you want to participate in.

STEP TWO: REGISTER FOR AN AUCTION

Once you have your username and password, simply find an auction you're interested in, and click on the "register" button. Your registration request will be sent to Superior, and once approved, you will be notified that you can now bid live for that auction.

STEP THREE: BID WITH CONFIDENCE!

On sale day, simply login, browse to the auction that you desire to participate in, and click the "Bid Live" button. Simply follow along with the auction, and when the price that you want to bid appears, click on the bid button. You will be told if you are the current high bidder, and if you won the lot.

OTHER WAYS TO PARTICIPATE: If you are unable to participate live, you are encouraged to leave an absentee bid. Simply browse to the auction and the lot that you are interested in, enter your absentee bid in the box, and click submit. Your bid will be executed by Superior at the appropriate time on your behalf.

EYE PIGMENTATION LEFT 90% RIGHT 100%

Another great pigmented, low birth weight 6006D son. 0130H has a lot to offer. Deep, long spined and thick, he has longevity bred into him. His dam is an easy doing brood cow that has always produced a keeper calf.

- Ratioed 101 REA and 109 IMF

The Spring Yearling Bulls

FS Advance 1001J

Top Herd Bull Prospect!

About the spring yearling bulls...

As a group, these spring yearling bulls had an average birth weight of 79 lbs., an average 205-day weight of 817 lbs. and an average 365-day weight of 1364 lbs. We have really focused on the carcass in our cattle, and this group of bulls scanned great. The average for this set of bulls is 12.04 sq. in. on REA and 4.06% on IMF.

THE BALD-FACED TRUTH

ABOUT HEREFORD GENETICS

Take advantage of hybrid vigor with Hereford genetics.

HEREFORD ADVANTAGE

Use the Hereford Advantage program to increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for the CHBS index.

MATERNAL ADVANTAGE

The Maternal Advantage program generates females with added longevity, more docility, increased fertility and more profit per year. Can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.

PREMIUM RED BALDY

Premium Red Baldy is designed to take advantage of the best traits of both Hereford and Red Angus. Females must be sired by bulls in the top 50% of the breed for Baldy Maternal Index (BMI\$) or Herdbuilder Index (HB).

EYE PIGMENTATION LEFT **100%** RIGHT **100%**

A short marked, red to the floor, powerfully constructed 8059F daughter that has "future donor" written all over her. 1003J is an elite individual and is certainly one that is hard to create and even harder to let leave the program. Take advantage of this elite female, as we believe she has uncapped earning potential.

- 105 NR and 111 YR
- Ratioed 132 on REA and 101 on IMF
- Sells open.
