Feb. 20, 2023 American Hereford Association report.
Updated GE-EPDs will be available sale day and
online at flyingsherefords.com

Welcome to Flying S Herefords!

We would like to invite you to join us for our 9th Annual Production Sale here at the ranch, located in Paluxy, Texas, southwest of Fort Worth. Our mission at Flying S Herefords is to produce elite Line One Horned Herefords that will excel in any environment for any type of operation. We have continued to invest in the top bloodlines from Holden Herefords and Cooper Herefords.

Our focus is on every aspect of the Hereford breed. We believe in a long-lasting performance Line One breeding program to increase the predictability of our cattle for our customers, whether Commercial or Seedstock. In order to succeed in Line One breeding, you must continue to introduce cattle with superior genetics. Flying S Herefords focuses heavily on the maternal abilities in our breeding program. We have a strict culling program that enables us to produce and retain only the genetically superior animals. Cows are culled based on fertility, performance, soundness, disposition, and udder quality.

We are active members in the Texas Hereford Association along with the American Hereford Association. We are involved with the TPR program of the American Hereford Association and are active members in the Whole Herd Reporting Program.

It is a great pleasure to be able to offer such an exceptional set of bulls and females to you. This group of bulls represents the best of our fall 2021 and spring 2022 calf crops. They are all sired by top trait leading, high quality Line One bulls. They are a balanced trait set of bulls that combine phenotype, uniformity, pigment, maternal strength, thickness, performance, fleshing ability, carcass, and eye appeal. All bulls and heifers sell with performance and ultrasound data and have been DNA parentage verified, GE-EPD tested and have been tested IE Free, HY Free and Dilutor Free. All bulls have been Trich and semen tested.

All sale cattle and our cow herd will be on display March 20th and 21st up to sale time. On Monday, the 20th, we will have drinks, snacks and a Crawfish Boil in the early evening along with cow herd tours in the afternoon. On sale day, coffee, snacks and lunch will be provided and will be catered by My Meat Is Sweet. Lunch will be served at 11:00 a.m., and the sale starts promptly at 12:00 noon.

Thank you for taking the time and having an interest in our program. We look forward to seeing y'all sale day. If you have any questions or we can be of any help, please feel free to call us any time.

Sale Terms & Conditions

Cattle sell under the recommended Sale Terms and Conditions of the American Hereford Assn.

Herd Health

Cattle will sell with proper health certificates for immediate interstate shipment.

Flying S Herefords is located 1 hour southwest of Fort Worth, between Glen Rose and Stephenville.

GPS address: 7955 CR 194, Bluff Dale, TX 76433

Go southwest of Granbury on Hwy. 51, then 5.1 miles west of the intersection of Hwys. 205 and 51 on County Road 194, or 3.8 miles east of FM 2481 on CR 194. Watch for our signs!

Absentee Bidding

Phone 800.422.2117 or 817.624.3800

Register to bid online at
bid.superiorlivestock.com

Livestock Insurance

Insurance for your purchases will be available at the clerk's desk.

Join us for lunch at 11 a.m. Catered by My Meat Is Sweet

Announcements made sale day from the auction block will take precedence over statements printed in the sale catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. All persons who attend the sale do so at their own risk. Neither the owners, the management, nor any other person connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

HEREFORD ADVANTAGE

Visit HerefordAdvantage.com to get started today!

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

- **Source & Age verification**
- **Genetic merit**
 - Minimum of 50% Hereford genetics
 - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
 - Bull ownership transferred (all bulls)
- **Vaccination program – two rounds of vaccinations pre-weaning (minimum)**
 - Recommended minimum protocol:

- **BQA certification**

American Hereford Association | (816) 842-3757 | 11500 NW Ambassador Drive, Suite 410, Kansas City, MO 64153 | HerefordAdvantage.com

BENEFITS

- **Genetic improvement tool**
 - **Sire EPD and profit index summary**
- **Added market exposure**
 - **Free listing at HerefordMarketplace.com**
- **Enrollment cost - \$3.00/hd. (verification + eID tag)**

Look for this logo in Hereford bull sale catalogs to identify sires meeting the genetic requirements for the Hereford Advantage program.

KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.

That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.

HH Advance 5107C was the high selling bull in Holden's 2016 sale for \$160,000 and is a maternal brother to the HH Advance 3297A herd bull. 5107C is built right from the ground up and is very conservatively marked. He sires calves that are big topped, square made, sound structured, big ribbed and phenotypically some of the best cattle we have produced. He is a powerful 215Z son that has an outstanding EPD profile combined with a flawless phenotype and is backed by the HH Miss Advance 9228W donor cow, who is a herd bull producing machine. Seven star Trait Leader.

7193E was the cover bull and leadoff bull in Holden's 2018 sale. He is an exciting son of the \$130,000 5110C Cooper bull. The more you study this bull, the more you like him. He is soft made, deep flanked, big bellied, extra thick, well marked, and very correct in his structure. Three different maternal brothers were used in Holden's herd, and a son out of a maternal sister was retained. We think a lot of this cow family and all the functional traits it brings to the table. 7193E also brings in the great 055X cow from Cooper's. He is a front pasture, all around herd sire that is destined to be a breed improver.

7053E is a top-notch HH Advance 5107C son that we retained from our 2019 sale. He is a pigmented, super fronted, easy moving, big bellied herd bull that has explosive muscle expression and natural fleshing ability. To top it off, he is a powerhouse herd bull that is back by individual performance and EPDs. 7053E has oodles of volume, thickness, a square hip, huge top, maternal, growth, carcass and eye appeal to burn. His dam, HH Miss Advance 7142T, has been a top producing donor and has produced several herd bulls that are working all over the US.

8120F topped Holden's 2019 sale at \$55,000 for half interest. Look at the bone, substance, and overall mass in this fantastic herd sire. 8120F is well marked, big testicled, super correct, and out of a great cow. Dam is a top donor with a freckle face and red on her teats. Maternal granddam is a donor for Cooper Herefords and produced their third high selling bull in their 2018 sale. Note the exceptional carcass EPDs and CHB\$ on 8120F. He is a true beef bull that will add value to all segments of the industry!

9082G is a goggle-eyed performance and maternal bull that is heavily pigmented, dark red, long bodied, deep sided, thick topped and very smooth made. His dam is a beautiful uddered 3006A donor cow for us that will continue to play a major role in our program moving forward. He had an actual birth weight of 70 lbs., an actual weaning weight of 842 lbs. and an actual yearling weight of 1462 lbs. We will continue to use 9082G in our AI program.

AHA Trait Leader for BW, SC, CEM and Teat Size.

- Used AI

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes.

The EPDs and \$Indexes included in our 2023 sale catalog are as follows:

Calving Ease Direct (CED)

CED EPD is based on calving ease scores and birth weights and is measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of +3.6 and sire B has a BW EPD of +0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lbs. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of +60 and sire B has a WW EPD of +40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lbs. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of +100 and sire B has a YW EPD of +70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lbs. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 Milk EPD should produce progeny with 205-day weights averaging 24 lbs. more (as a result of greater milk production) than daughters of a bull with a Milk EPD of -10 lbs. (14 minus -10 = 24 lbs.). This difference in weaning weight is due to total milk production during the entire lactation.

Carcass Weight (CW)

CW EPD is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD of 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Breed average EPDs for 2021/2022 born calves:

CED	BW	WW	YW	SC	MILK	CW	REA	MRB	BMI\$	BIIS	CHBS
+2.7	+2.8	+56	+89	+1.0	+27	+69	+43	+11	+346	+418	+115

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MRB)

Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, or IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marbling EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMI\$)

The BMI\$ is a **maternally focused index** that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep the harvested progeny successful for CHB. ***This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.***

Brahman Influence Index (BIIS)

The BIIS is a **maternally focused index** that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef® does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. ***This index targets producers who use Hereford bulls on Brahman-influenced cows.***

Certified Hereford Beef Index (CHBS)

This is a **terminal sire index** that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CED and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF, with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest, where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. ***This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.***

For more information, log on to www.hereford.org

The EPDs printed in the catalog are from the Feb. 20, 2023 American Hereford Association report.
Updated GE-EPDs will be available sale day and online at flyingsherefords.com

Top Herd Bull Prospect!

1080J has been one of my favorites from the start in this fall set of bulls. He continues to catch my eye every time I go through them. He reminds me a lot of his maternal brother 0079H that sold in last year's sale to Coleman Herefords and Oleen Brothers for \$15,000 and is doing a wonderful job for them. 1080J is a calving ease bull that is well marked, thick made, deep bodied, long spined and fancy. His dam is a beautiful uddered 221 daughter that is backed by a lot of proven females. Granddam is the great 7142T donor.

- Ratioed 106 on IMF
- Dam has progeny ratios on 6 calves: 103.2 NR, 106.3 REA

Donor dam of 1087J, 1108J & 1111J

Pick of the Flush 1

1087J, 1108J and 1111J are the result of an outstanding flush out of 2022Z, a prolific, proven powerhouse donor female with pigment, big body, deep sided, great uddered and super stylish. She has outstanding EPDs and is backed by one of the top cow families in the breed, combined with herd sire 8120F, who has an immaculate phenotype with big-time power EPDs and carcass.

- Full brothers sell as Lots 1082J and 1088J
- Selling the buyer's choice of 1087J, 1108J or 1111J

Pick of the Flush 1

Pick of the Flush 2

1098J and 1106J are the result of a very powerful flush out of the 8062F donor combined with the 8120F herd sire. A full sister to our 8059F herd sire, 8062F is long bodied, well marked and has a super udder. This flush really produced a lot of bone and volume along with some really great EPDs and carcass.

- Selling the buyer's choice of 1098J or 1106J

ABSENTEE BIDDERS: HOW TO PARTICIPATE ON THE PHONE OR ONLINE

We have made preparations to bid and buy livestock through Superior Livestock Auction for buyers unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at: bid.superiorlivestock.com

Here's How It Works

Viewing the Auction. The auction will be broadcast online at Bid.SuperiorLivestock.com. The pre-recorded videos will also be hosted there. You do not need an account just to watch the auction or view videos of the sale offering.

Online Bidding. Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before, you will need to create an account. The first time you register an account, you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number, you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This two-step verification process will only have to be done once; in the future, you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number, it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv, you may skip the registration process and use those login credentials to request a buyer number, as LiveAuctions is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works

Turn in Bids Over the Phone. This is Superior's traditional method of buying cattle and is the suggested process for anyone who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number, you will see the bid line phone number. Just watch the auction online and call in at least two lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS, PLEASE CALL SUPERIOR AT (800) 422-2117.
