think Line One - think Flying S Herefords!

The EPDs printed in this catalog are from the Feb. 19, 2024 American Hereford Association report.

Updated GE-EPDs will be available sale day and online at flyingsherefords.com

Welcome to Flying S Herefords!

We would like to invite you to join us for our **10th Annual Production Sale** here at the ranch, located in Paluxy, Texas, southwest of Fort Worth. Our mission at Flying S Herefords is to produce elite Line One Horned Herefords that will excel in any environment for any type of operation. We have continued to invest in the top bloodlines from Holden Herefords and Cooper Herefords.

Our focus is on every aspect of the Hereford breed. We believe in a long-lasting performance Line One breeding program to increase the predictability of our cattle for our customers, whether Commercial or Seedstock. To succeed in Line One breeding, you must continue to introduce cattle with superior genetics. Flying S Herefords focuses heavily on the maternal abilities in our breeding program. We have a strict culling program that enables us to produce and retain only the genetically superior animals. Cows are culled based on fertility, performance, soundness, disposition, and udder quality. We are active members in the Texas Hereford Association along with the American Hereford Association. We are involved with the TPR program of the American Hereford Association and are active members in the Whole Herd Reporting Program.

It is a great pleasure to be able to offer such an exceptional set of bulls and females. This group of bulls represents the best of our fall 2022 and spring 2023 calf crops. They are all sired by top, trait leading, high quality Line One bulls. They are a balanced trait set of bulls that combine phenotype, uniformity, pigment, maternal strength, thickness, performance, fleshing ability, carcass, and eye appeal. All bulls and heifers sell with performance and ultrasound data and have been DNA parentage verified, GE-EPD tested and have been tested IE Free, HY Free and Dilutor Free. All bulls have been Trich and semen tested. The GE-EPDs will be available before sale day.

All sale cattle and our cow herd will be on display March 18th and 19th up to sale time. On Monday, the 18th, we will have drinks, snacks and dinner in the early evening along with cow herd tours in the afternoon. On sale day, coffee, snacks and lunch will be provided and will be catered by My Meat Is Sweet. Lunch will be served at 11 a.m., and the sale starts promptly at 12 noon.

Thank you for taking the time and having an interest in our program. We look forward to seeing y'all sale day. If you have any questions or we can be of any help, please feel free to call us any time.

Sale Terms & Conditions

Cattle sell under the recommended Sale Terms and Conditions of the American Hereford Assn.

Herd Health

Cattle will sell with proper health certificates for immediate interstate shipment.

Flying S Herefords is located 1 hour southwest of Fort Worth, between Glen Rose and Stephenville.

GPS address: 7955 CR 194, Bluff Dale, TX 76433

Go southwest of Granbury on Hwy. 51, then 5.1 miles west of the intersection of Hwys. 205 and 51 on County Road 194, or 3.8 miles east of FM 2481 on CR 194. Watch for our signs!

Absentee Bidding

Phone 800.422.2117 or 817.624.3800
 Register to bid online at
bid.superiorlivestock.com

Livestock Insurance

Insurance for your purchases will be available at the clerk's desk.

Join us for lunch at 11 a.m. Catered by My Meat Is Sweet

Announcements made sale day from the auction block will take precedence over statements printed in the sale catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. All persons who attend the sale do so at their own risk. Neither the owners, the management, nor any other person connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

NOW IS THE TIME TO ADD VALUE.

Check out this industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

- **Source & Age verification**
- **Genetic merit**
 - Minimum of 50% Hereford genetics
 - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
 - Bull ownership transferred (all bulls)
- **Vaccination program – two rounds of vaccinations pre-weaning (minimum)**
 - *Recommended minimum protocol:*

PrimeVAC[™] 34
PREMIUM
BY MERCK ANIMAL HEALTH

- **BQA certification**

BENEFITS

- **Genetic improvement tool**
 - **Sire EPD and profit index summary**
- **Added market exposure**
 - **Free listing at [HerefordMarketplace.com](https://www.herefordmarketplace.com)**
- **Enrollment cost - \$3.00/hd.**
(verification + eID tag)

Look for this logo in Hereford bull sale catalogs to identify sires meeting the genetic requirements for the Hereford Advantage program.

3006A was the high-selling bull in Holden's 2014 sale at \$80,000 for half interest and half possession and is an outstanding bull in every way. Long bodied, thick made, well-marked and fancy, and he backs it all up with outstanding performance and ultrasound data and great EPDs. He is backed by one of Holden's best cow families. His progeny have tremendous pigment, growth, length, depth, shape, style and eye appeal. AHA Trait Leader for SC, Milk, M+G and Fat.

HH Advance 5107C was the high selling bull in Holden's 2016 sale for \$160,000 and is a maternal brother to the HH Advance 3297A herd bull. 5107C is built right from the ground up and is very conservatively marked. He sires calves that are big topped, square made, sound structured, big ribbed and phenotypically some of the best cattle we have produced. He is a powerful 215Z son that has an outstanding EPD profile combined with a flawless phenotype and is backed by the HH Miss Advance 9228W donor cow, who is a herd bull producing machine. Eight star Trait Leader.

6250D was the heaviest bull on adj. 365 day weight that Holden has ever produced to date. He has tremendous length, volume, and overall capacity. He has huge goggle eyes on both sides, is red to the ground, and has great testicular development. He is out of the 1126Y Holden donor that produced over \$140,000 in progeny sales in their 2016 sale and has had two flushes sell for over \$20,000 each.

7193E was the cover bull and leadoff bull in Holden's 2018 sale. He is an exciting son of the \$130,000 5110C Cooper bull. He is soft made, deep flanked, big bellied, extra thick, well marked and very correct in his structure. Three different maternal brothers were used in Holden's herd, and a son out of a maternal sister was retained. We think a lot of this cow family and all the functional traits it brings to the table. 7193E also brings in the great 055X cow from Cooper's. This all-around herd sire is destined to be a breed improver. Trait Leader for Marbling and all \$Indexes.

7053E is a top-notch HH Advance 5107C son that we retained from our 2019 sale. He is a pigmented, super fronted, easy moving, big bellied herd bull that has explosive muscle expression and natural fleshing ability. To top it off, he is a powerhouse herd bull that is back by individual performance and EPDs. 7053E has oodles of volume, thickness, a square hip, huge top, maternal, growth, carcass and eye appeal to burn. His dam, HH Miss Advance 7142T, has been a top producing donor and has produced several herd bulls that are working all over the US.

8120F topped Holden's 2019 sale at \$55,000 for half interest. Look at the bone, substance, and overall mass in this fantastic herd sire. 8120F is well marked, big testicled, super correct, and out of a great cow. Dam is a top donor with a freckle face and red on her teats. Maternal granddam is a donor for Cooper Herefords and produced their third high selling bull in their 2018 sale. Note the exceptional carcass EPDs and CHBS\$ on 8120F. He is a five star Trait Leader and a true beef bull that will add value to all segments of the industry!

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes.

The EPDs and \$Indexes included in our 2024 sale catalog are as follows:

Calving Ease Direct (CED)

CED EPD is based on calving ease scores and birth weights and is measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of +3.6 and sire B has a BW EPD of +0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lbs. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of +60 and sire B has a WW EPD of +40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lbs. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of +100 and sire B has a YW EPD of +70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lbs. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (Milk)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 Milk EPD should produce progeny with 205-day weights averaging 24 lbs. more (as a result of greater milk production) than daughters of a bull with a Milk EPD of -10 lbs. (14 minus -10 = 24 lbs.). This difference in weaning weight is due to total milk production during the entire lactation.

Carcass Weight (CW)

CW EPD is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD of 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Breed average EPDs for 2022-born calves:

CED	BW	WW	YW	SC	MILK	CW	REA	MARB	BMIS	BIIS	CHBS
+3.3	+2.7	+55	+88	+1.0	+26	+70	+43	+13	+357	+431	+118

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MRB)

Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, or IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marbling EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMI\$)

The BMI\$ is a **maternally focused index** that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep the harvested progeny successful for CHB. *This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.*

Brahman Influence Index (BIIS)

The BIIS is a **maternally focused index** that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef® does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and ribeye area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. *This index targets producers who use Hereford bulls on Brahman-influenced cows.*

Certified Hereford Beef Index (CHBS)

This is a **terminal sire index** that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CED and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF, with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest, where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. *This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.*

For more information, log on to www.hereford.org

The EPDs printed in the catalog are from the Feb. 19, 2024 American Hereford Association report.

Updated GE-EPDs will be available sale day and online at flyingsherefords.com

THE POWER OF GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA TRAIT	ACCURACY IMPROVEMENT	EFFECTIVE PROGENY NUMBER INCREASE*
CALVING EASE	0.09	17
BIRTH WEIGHT	0.12	8
WEANING WEIGHT	0.14	12
YEARLING WEIGHT	0.16	9
SCROTAL CIRCUMFERENCE	0.17	6
MATURE COW WEIGHT	0.12	4
UDDER SUSPENSION	0.17	7
TEAT SIZE	0.17	7
CARCASS WEIGHT	0.11	3
FAT	0.08	2
RIB-EYE AREA	0.07	2
MARBLING	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Each animal tested is recognized with the AHA GE-EPD logo.

KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.
 That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.

Donor dam of 2022K, 2023K & 2036K

Selling Buyer's Choice of 3 Maternal Sisters

This is a very rare opportunity to be able to choose from the heart of our program and from one of our most productive donor cows we have produced. Three sons have averaged \$21,000 in our past sales.

2022K, 2023K and 2036K are the results of outstanding flushes out of 510C, a prolific, proven powerhouse donor female with pigment, big body, deep sided, great uddered and super stylish. She has outstanding EPDs and is backed by one of the top cow families in the breed, combined with herd sires 8120F, 0074H and 0159H. 8120F has an immaculate phenotype with big time power EPDs and carcass. 0074H is thick made, fancy fronted, deep ribbed, and has exceptional EPDs. 0159H is well marked, soft made, thick butted and loaded with growth and carcass strength.

- Maternal brothers sell as Lots 2024K, 2034K and 2035K

ABSENTEE BIDDERS: HOW TO PARTICIPATE ON THE PHONE OR ONLINE

We have made preparations to bid and buy livestock through Superior Livestock Auction for buyers unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at: bid.superiorlivestock.com

Here's How It Works

VIEWING THE AUCTION ONLINE

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there prior to and on sale day. You do not need an account or login just to watch the auction.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account if you wish to bid (there is no registration required just to watch the auction). Once you have created an account, request a buyer number and you will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!

TURN IN BIDS OVER THE PHONE

This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS, PLEASE CALL SUPERIOR AT (800) 422-2117.

Thank you for taking the time and having an interest in our program!
